1 Data mining assists in a relational database management system

Inventor: MILLER TIMOTHY EDWARD (US); TATE BRIAN Applicant: NCR CORP (US)
DON (US); (+3)
EC: IPC: **G06F17/00; G06N5/02; G06F17/00** (+1)
Publication info: **US7162464** - 2007-01-09

2 System and method for multidimensional extension of database information using inferred groupings

Inventor: LANCASTER BRIAN J (US); YARBROUGH MICHAEL E (US); (+3)
EC: IPC: **G05B13/02; G05B13/02**

Publication info: **US2007005154** - 2007-01-04

3 Method and apparatus for providing an expression data mining database

Inventor: BALABAN DAVID J (US); KHURGIN ELINA (US)
EC: IPC: **G06F17/30; G06F17/30**

Publication info: **US2006271513** - 2006-11-30

4 System, service, and method for characterizing a business intelligence workload for sizing a new database system hardware configuration

Applicant POLYVISTA, INC.		

This International Searching Authority hereby declares, according to Article 17(2)(a), that no international search report will be established on the international application for the reasons indicated below

1. The subject matter of the international application relates to:
 - a. scientific theories.
 - b. mathematical theories
 - c. plant varieties.
 - d. animal varieties.
 - e. essentially biological processes for the production of plants and animals, other than microbiological processes and the products of such processes.
 - f. schemes, rules or methods of doing business.
 - g. schemes, rules or methods of performing purely mental acts.
 - h. schemes, rules or methods of playing games.
 - i. methods for treatment of the human body by surgery or therapy.
 - j. methods for treatment of the animal body by surgery or therapy.
 - k. diagnostic methods practised on the human or animal body.
 - l. mere presentations of information.
 - m. computer programs for which this International Searching Authority is not equipped to search prior art.

2. The failure of the following parts of the international application to comply with prescribed requirements prevents a meaningful search from being carried out:

the description the claims the drawings

3. The failure of the nucleotide and/or amino acid sequence listing to comply with the standard provided for in Annex C of the Administrative Instructions prevents a meaningful search from being carried out:
 - the written form has not been furnished or does not comply with the standard.
 - the computer readable form has not been furnished or does not comply with the standard.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 203

All present claims relate to an extremely large number of possible apparatus or methods. In fact, the claims contain so many options and variables that a lack of clarity (and/or conciseness) within the meaning of Article 6 PCT arises to such an extent as to render a meaningful search of the claims impossible. Consequently, no search report can be established for the present application.

The applicant's attention is drawn to the fact that claims relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure. If the application proceeds into the regional phase before the EPO, the applicant is reminded that a search may be carried out during examination before the EPO (see EPO Guideline C-VI, 8.5), should the problems which led to the Article 17(2) declaration be overcome.
